

Hose Recovery Unit HRU 300

Hose Recovery Unit 300:

Hose Recovery Unit 300, suitable for hoses from 200 mm (8 inch) to 300 mm (12 inch)

Hydraulic driven triple roller system, with double electronic-eye PLC controlled pressure rollers.

Facilitating easy hose retrieval with minimum manpower in minimal time. 2-speeds operable by remote control.

HRU300 Power Tilt

The Power Tilt feature enables the HRU-200 to be raised from transport position to working position hydraulically. Can be installed either in fixed version with hydraulic fold-up fold-down provisions, or in (with lift facility) exchangeable (between different containers) version. Inclusive flow/pressure control valve, hoses and quick connect couplings for the link-up with the truck's hydraulics.

HRU300 Demountable

This demountable HRU300 can be positioned (by a crane) into a corner bracket of an existing hose layer.

Storage and transport of HRU300 should be done separate from the hose layer container. Please ask for more information To be powered by trucks PTO-hydraulics (not part of the HRU supply).

Bumper Hose Guide

A roller for 10 and 12" hoses.

Completely installed on truck chassis at Lemmer.

Although not really necessary for trained drivers, this tool makes the driver's task even easier.

It also benefits hose recovery work in very cramped area's
