Solovision S2 面世

**WORLDS SMALLEST
HAND HELD/HANDSFREE THERMAL
IMAGING CAMERA**

GB SOLO LTD is proud to announce the launch of
the NEW SOLOVISION S2 FIRE and SOLOVISION S2
Search & Rescue

Half the size of the original SoloVision and the lightest fire fighting TIC in the world

The SOLOvision S2 can be used as a hands-free unit or it can be hung over the neck like a pair of binoculars using the neck strap. It is the lightest and smallest thermal imaging camera in the World. It is suitable for use with all known breathing apparatus and gas masks. As an all round camera with the capability to monitor for fire / search and rescue of victims, there is no better camera for the job.

Weighing only 750g with the ability to adapt the camera to suit individual requirements, the S2 takes hand held and hands free technology even further.

Eagle Business Services
